

MOBILE CONNECTIVITY SOLUTIONS

Supporting Mobile Health Clinics & Community Healthcare Providers

MARKET ANALYSIS

Mobile Clinics and Healthcare Providers serving the approximately 50 million people who reside in rural communities face unique challenges in their effort to deliver reliable and quality care. The realities of distance, isolation, and constricted resources complicate health care delivery. Health information technology can reduce some of these issues. However, several barriers still impede operational efficiencies, most especially:

- Lack of broadband access for communications
- Insufficient financial capital and reimbursement models

OUR MISSION

- ▶ To establish a national network of secure, reliable and high-speed wireless connection points that will enable broadband access by Healthcare Providers working in critically underserved rural communities throughout the U.S. and its territories.
- ▶ To enhance the capacity of mobile devices for general administrative communications including:
 - Electronic medical records (HIPAA compliant)
 - Prescription/medical orders
 - Medical or dental imaging
 - Real-time video conferencing ~ telemedicine/teledentistry
 - Patient education, integration and monitoring
 - Distance learning ~ provider training
 - Vendor/visitors connectivity
 - Staffing coordination
- ▶ To explore financial resources for launching and sustaining broadband connectivity.
- ▶ To invite partnerships in rural and urban areas that share a common goal of expanding healthcare services and have an imminent need for improved broadband connectivity.

OUR LEADERSHIP TEAM

Mobile Connectivity Solutions (MCS) is led by a team of highly knowledgeable professionals with expertise in the fields of mobile healthcare, marketing and telecommunications. MCS is an independent initiative of the Mobile Health Care Authority.
